Xerox® Pull Print Driver

Single, configurable print driver for users
of popular "Pull Printing" solutions.

Convenient, easy to use and deploy. Today, the needs of businesses stretch beyond the hallway printer. With the Xerox® Pull Print Driver and pull print applications, the printer location no longer matters. You can click "Print" at your desktop and request copies of your presentation on another floor or in a different building in time to make your meeting.

Behind the scenes, the Pull Print Driver works in conjunction with a single queue or pull queue application. This allows print jobs to "follow" the user to whichever Xerox® printer or multifunction printer (MFP) he or she selects. At the printer or MFP, card or network authentication gives the user access to a list of print jobs on the server. Simple, convenient user screens make managing and releasing those jobs a snap. Once a selection is made, the system "pulls" the jobs for printing at that device.

SINGLE-DRIVER SIMPLICITY

The Xerox® Pull Print Driver streamlines fleet administration by allowing you to opt for a single, configurable print driver for your fleet of Xerox® devices (details at **www.xerox.com/drivers**). The driver leverages all the productive features of compatible Xerox® printers and MFPs, including finishing, simplex/duplex printing and environmental settings. It's smart, too. If a job with finishing selected is released at a printer or MFP without a finisher, the device will simply ignore the finishing command and deliver plain prints.

The Xerox® Pull Print Driver extends the convenience and ROI of "pull print" workflows across a broad range of printing assets. IT administrators no longer need to set up, manage and configure multiple drivers, and provision multiple printer drivers on user desktops.

Further, the Pull Print Driver simplifies deployment and usage for administrators and customers. and it readily integrates with Xerox® Print Management and Mobility Suite, Equitrac Office®, Ysoft® SafeQ®, Pharos® and others.

xerox

IDEAL FOR PULL PRINT WORKFLOW ENVIRONMENTS

Designed for superior integration and flexibility, the driver allows you to leverage current and future investments in print management systems and workflows.

- Convenient: Allows end users to send and later decide where to print at their chosen device.

- Secure: Leverages current investments in authentication, e.g., user logins and swipe cards.

- Accountable: Controls costs by supporting accounting, monitoring and additional cost controls systems from Xerox and others.

- Efficient: Eliminates the need to learn and install multiple drivers; IT can "qualify once, use many."

- Standardization: Establishes one, easy-to-use interface and shared workflow across the enterprise.

- Forward compatible: Avoids wholesale driver upgrades when you add future Xerox® products to your fleet.
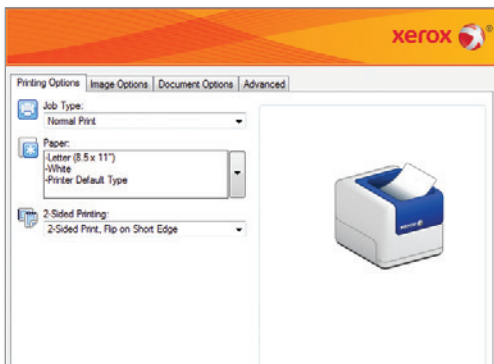

XEROX® PULL PRINT DRIVER PREREQUISITE

Must have a Pull Print Solution installed and configured with a Xerox® Printer or multifunction printer (MFP); e.g., Xerox® Print Management and Mobility Suite, Equitrac Office®, Ysoft® SafeQ®, Pharos® and more.
